Iterative Strength Ratings

The Iterative Strength Ratings (ISR's) are the author's best attempt at an objective rating system which covers all Division I teams. More information about the rating system -- including past results so that you can get a feel for how accurate they are, a technical description of the methods used, and information about the author -- can be found on the Boyd's World Web site at <http://www.boydsworld.com>. Records listed are those against Division I competition only.

#	Team	Rating	W	L	#	Team	Rating	W	L	#	Team	Rating	W	L

Pseudo-Power Ratings Index

The pseudo-Ratings Power Index (pseudo-RPI's) is the author's best attempt at recreating the RPI ratings used by the selection committee in choosing the tournament field. While these ratings are badly flawed, they are useful in seeing what the committee is seeing while making their choices. More information about the rating system can be found on the Boyd's World Web site at <http://www.boydsworld.com>. Records listed are those against Division I competition only.

Boyd's World Weekly Release

<http://www.boydsworld.com>

Conference Rankings

The conference rankings really show the problems with the RPI's, especially in regards to West Coast teams, since there is some evidence from committee member statements that they pay a good bit of attention to the conference RPI's. More information about the rating systems can be found on the Boyd's World Web site at <http://www.boydsworld.com>. Records listed are those against Division I competition only; ISR records are non-conference games only.

ISR's

#	Conference	Rating	W	L
1	Big 12	114.7	357	239
2	SEC	114.5	444	287
